

### **Micro Led Arrays Cea**

Leti is developing a new generation of photonic components: micro LED ( $\mu$ LED) arrays. This breakthrough technology brings advances in multiple applications including smart lighting, augmented reality in integrated smart glasses and large/transparent, flexible 3D displays.

French lab CEA-Leti has demonstrated a way to make high-density micro LED arrays for wearable vision. The LEDs are GaN/InGaN - the technology behind white

### **Micro LED arrays display achieves 1,000,000 cd/m2**

CEA-Leti is a non-profit research institute based in Grenoble, France. CEA-Leti is one of the world's largest microelectronics and nanotechnology organizations. Leti is developing micro LED displays, with a focus on high-performance microdisplays. Leti has implemented this LED technology to manufacture high-brightness  $\mu$ LED arrays hybridized on silicon circuit with a 10- $\mu$ m pixel pitch and the ...

### **CEA-Leti - MicroLED-Info | The Micro-LED Experts**

CEA-Leti has demonstrated a path to fabricating high-density micro-LED arrays for the next generation of wearable and nomadic systems in a process that is scalable to the IC manufacturing process.

### **Leti demos high-brightness micro-LED arrays for next ...**

Gallium-nitride (GaN) and Indium Gallium-nitride (InGaN) Technology Targets Fast-growing Markets for Wearable Vision Systems GRENoble, France – CEA-Leti announced that it has demonstrated a path to fabricating high-density micro-LED arrays for the next generation of wearable and nomadic systems in a process that is scalable to the IC ...

### **Leti develops high-brightness micro LED array process for ...**

CEA LETI: Micro-LEDs Future Applications and Current Challenges ( Authors: Judy Lin, Chief Editor, LEDinside and Philip Chang, Analyst, LEDinside) Micro LEDs are gaining traction in the LED industry since it is a technology that industry experts view as capable of breaking LCDs low light efficiency, and achieve “real LED display” technology.

### **CEA LETI: Micro-LEDs Future Applications and Current ...**

Extending its expertise in high-brightness microdisplay technology for augmented-reality and other applications, Leti will demonstrate the world's first wide video graphic array (WVGA) GaN microdisplay with 10-micron pixel pitch during Display Week in Los Angeles, May 21-26.

### **Leti will Demo World's-First WVGA 10- $\mu$ m Pitch GaN ...**

Researchers from Leti, a research institute of CEA Tech, have developed a self-aligning  $\mu$ LED fabrication process that supports the creation of high-resolution arrays of  $\mu$ LED at 10-micron pitch (roughly equating a 2540dpi resolution).

### **Wafer-level micro-LED matrix delivers high brightness at ...**

microLED, also known as micro-LED, mLED or  $\mu$ LED, is an emerging flat panel display technology. MicroLED displays consist of arrays of microscopic LEDs forming the individual pixel elements. When compared to the widespread LCD technology, microLED displays offer better contrast , response times , and energy efficiency .
